

# Ready Reference Checklist

## OVERHEAD CRANES

### YOU WILL NEED AN OVERHEAD CRANE THAT MEETS THE FOLLOWING CRITERIA:

- Three ton minimum lifting capacity, with powered functions for *hoist, bridge, and trolley*
- Minimum bridge span of 25 ft.
- Minimum hook height of 13 ft.

### YOU WILL NEED THE FOLLOWING FOR EACH CRANE TO BE TESTED ON:

- A 3 ft. diameter cylindrical Test Weight, 2–5 ft. tall, weighing between 1,500 and 2,000 lb. (including rigging), verified by a weight ticket, crane's load indicating device (LMI, RCI, RCL), or other type of certification documenting the actual load weight available to the Examiner
- One 3 ft. length of 3/8-inch or 5/16-inch chain, painted orange or red, measured from the lowest point of the Test Weight (including feet), and attached to the center of the Test Weight
- Picking ears are mounted inside the Test Weight, or if mounted on the outside of the Test Weight the bottom of ears are at least 3 ft. 6 in. above the bottom of the weight
- Test Weight rigging is 2–4 ft. in length (load-bearing point to load-bearing point); if using multiple sling legs, recommend 60 degree sling angles (minimum 30 degrees required)
- PVC pipe, white, 1½ in. (SCH 40), sufficient to make 54 three-foot-long poles
- ¾-inch, CDX-grade (or better) plywood or 1-inch high density polyethylene (HDPE)\*, sufficient to create 54 pole bases, 12 in. × 12 in. (nominal); must weigh 5 lb. ± 10%
- 54 tennis balls
- 54 ft. of #18 nylon string, to attach tennis balls to poles (optional)
- 108 1¼-inch zinc-plated (galvanized) screws, or equivalent, to secure nylon string to tennis balls and poles (optional)
- Two horizontal poles, made of 1½-inch PVC pipe, painted red or orange 12 in. on both ends and 12 in. in the middle
- 500 ft. brightly colored string line (for Right Angle Corridor and CAD layout use) **NOTE: Chalk line may be used on concrete floors**
- Paint (orange or red) for painting the poles and chain **NOTE: Red tape may be used for the poles**
- Rubber mats or paint to mark circular designated areas
- 15 ft. × 27 in. carpet runner, with three 9 in. painted square targets per diagram
- 13 ft.-15 ft. Chain-and-Ring Assembly per diagram
- Pin Assembly per diagram
- Handheld wind speed indicator (anemometer) for outside testing only
- 100 ft. tape measure
- 30 ft. steel tape (e.g., carpenter's)
- Stopwatches and clipboards for Examiner(s) and Proctor(s)
- Two-way communications devices (for cab-operated exams)
- Cab-operated cranes with cab floor/platform more than 25 ft. above ground only:** Four lengths of 3/8- or 5/16-inch chain, painted red or orange, each 3 ft. long when measured from the lowest point of the Test Weight (including feet); attached around the perimeter of the Test Weight at 0, 90, 180, and 270 degrees

### \*EQUIPMENT SOURCES

NCCCO does not endorse or recommend specific vendors of any equipment, but the following sources may be helpful in finding the required materials and equipment:

- **HDPE bases:** House of Plastics (part number HOP01-055), 2580 S. Orange Blossom Trail, Orlando, FL 32805, 407-843-3290, plastics@hopu.com
