

Cudd Energy Services (CES) is a leading oil and gas service provider for onshore and offshore drilling, completion, production and workover services. With a commitment to excellence in service and performance, CES provides solutions that improve work efficiencies, manage risks and enhance resource recovery.

CES provides a range of services, including stimulation (hydraulic fracturing and acidizing), coiled tubing, e-coil, hydraulic workover, nitrogen, cementing, slickline/braided line, electric line, industrial nitrogen, water management (water transfer and biocide treatment), well control (engineering and critical well intervention) and special services (gate valve drilling, hot tapping, freezing).

CES is strategically located in major shale plays across North America and selected international markets, including the Bakken, Barrett, Eagle Ford, Fayetteville, Haynesville, Marcellus, Mississippi Lime, Niobrara, Permian Basin, San Juan, Tuscaloosa Marine, Utica and Woodford shales.
